

Progress of SDG Indicators in the State of Qatar

The Planning and Statistics Authority (PSA), represented by the Statistics Department, in cooperation with various ministries and government agencies, has produced SDG national indicators. Currently, 203 of these national indicators are available and they make up 82.2% of total 247 indicators. There are 28 unavailable indicators, representing 11.3%, that need to be provided through surveys or administrative records, while the number of indicators being provided is 6 representing 2.4%. As for indicators that do not apply to Qatar, they amount to 8, representing 3.2% of total indicators, while the number of indicators related to organization accounts is 2, representing 0.8% of total indicators.

Table (1)

SDG indicators by availability of Indicator Data 2020

SDG's2030	Available	Being Provided	Unavail able	NA	Organiz ations' Account	Total	Data Availabil ity= (A+D+E)/ F
	A	B	C	D	E	F	
SDG 1	12			1		13	100%
SDG 2	10		4			14	71%
SDG 3	26		2			28	93%
SDG 4	12					12	100%
SDG 5	13		1			14	93%
SDG 6	8		2	1		11	82%
SDG 7	5		1			6	83%
SDG 8	14		2			16	88%
SDG 9	11	1				12	92%
SDG 10	11			2	1	14	100%
SDG 11	14					14	100%
SDG 12	9		4			13	69%
SDG 13	8					8	100%
SDG 14	8		1	1		10	90%
SDG 15	7		5	2		14	64%
SDG 16	20		3	1		24	88%
SDG 17	15	5	3		1	24	67%
Total	203	6	28	8	2	247	86%

Data Sources, Data Periodicity and Intersections

The figure indicates that the SDG indicators depend mostly on data sources of administrative records, statistical surveys and censuses.

The PSA has been able to provide SDG indicators for a large number of details that show individual characteristics such as gender, nationality, age groups, educational status, social status, disability status, profession, sector, economic activity and other variables.
